QUARTERLY REPORT OF BATTERIES AND ACCUMULATORS PRODUCER			Production		Import		Export*		Re-export**		Put on the Slovak market			
Types of batteries and accumulators	Chemical composition	Shortcut	Primary (non rechargeable)	Secondary (rechargeable)	Primary (non rechargeable)	Secondary (rechargeable)								
PORTABLE batteries		•	kgs	kgs	kgs	kgs	kgs	kgs	kgs	kgs	kgs	kgs		
Portable batteries - 5 kg or less	Zinc-carbon / Zinc-chloride	ZnC / ZnCl												
	Alkaline-manganese / Nickel-zinc	AlMn / NiZn												
	Lithium	Li												
	Lithium-thionyl-chloride	Li-SoCl2									not entered manually, the system automatically calculates according to the formula = Production + Import - Export - Reexport			
	Lithium-ion / Lithium-polymer	Li-Ion / Li-Pol												
	Nickel-metal-hydride	NiMH												
	Silver-oxide	AgO												
	Zinc-air	ZnAir												
	Lead	Pb												
	Nickel-cadmium	NiCd												
	Other	-												
INDUSTRIAL batteries			kgs	kgs	kgs	kgs	kgs	kgs	kgs	kgs	kgs	kgs		
Industrial batteries - more than 5 kg	Lithium	Li									not entered manually, the system automatically calculates according to the formula = Production			
	Lithium-iron-phosphate	LiFePO4												
	Lithium-ion / Lithium-polymer	Li-Ion / Li-Pol												
	Nickel-metal-hydride	NiMH												
	Nickel-cadmium	NiCd												
	Lead	Pb												
	Other	-												
Light means of transport batteries (LMT) - 25 kg or less	Lithium	Li									+ Import - Export - Reexport			
	Lithium-ion	Li-Ion												
	Lead	Pb												
	Other	-												
Electric vehicle batteries (EV) - more than 25 kg	Lithium-ion	Li-Ion												
	Other	-									]			

## Notes:

The volume of quantities of a particular commodity must be rounded to the nearest whole kg.

According to Section 46 (2) of Act No. 79/2015 Coll. a producer of portable batteries and accumulators, is not allowed to show separately the costs of collection, treatment and recycling, when selling them to the final consumer.

\* To be completed only in relation to the item "Production"

\*\* To be completed only in relation to the item "Import"

'portable battery' means a battery that is sealed, weighs 5 kg or less, is not designed specifically for industrial use and is neither an electric vehicle battery, an LMT battery, nor an SLI battery;

<u>'industrial battery</u>' means a battery that is specifically designed for industrial uses, intended for industrial uses after having been subject to preparation for repurposing, or any other battery that weighs more than 5 kg and that is neither an electric vehicle battery, an LMT battery, nor an SLI battery;

<u>'light means of transport battery</u> or 'LMT battery' means a battery that is sealed, weighs 25 kg or less and is specifically designed to provide electric power for the traction of wheeled vehicles that can be powered by an electric motor alone or by a combination of motor and human power, including type-approved vehicles of category L within the meaning of Regulation (EU) No 168/2013 of the European Parliament and of the Council (43), and that is not an electric vehicle battery;

<u>'electric vehicle battery'</u> means a battery that is specifically designed to provide electric power for traction in hybrid or electric vehicles of category L as provided for in Regulation (EU) No 168/2013, that weighs more than 25 kg, or a battery that is specifically designed to provide electric power for traction in hybrid or electric vehicles of categories M, N or O as provided for in Regulation (EU) 2018/858;
